

# **RIA 2020 Better Regulation Strategy**

# REGULATION CYCLE

# REGULATION CYCLE

## RIA 2020 VISION

RIA 2020 represents a transition to a new culture of better regulation in Slovakia. We expect that due to its implementation, we will **raise public awareness of better regulation** and its benefits. **Regulatory Impact Assessment** will be a respected part of the new regulations' preparatory stage. Existing regulations will be **evaluated on a systematic basis** according to the changes in environment and those which will be assessed as inefficient or redundant will be modified or abolished from the regulatory framework. **Innovations** such as behavioural approach will be supported in preparation stage of regulatory cycle. Better regulation tools will be available for **all regulation-makers**. **Complex IT Platform for Better Regulation** will be a key component in fulfillment of the vision.

# 1. RAISE PUBLIC AWARENESS OF BETTER REGULATION

## Trainings
